**NPRG RELEASES REPORT ON  
*THE COMPETITIVE CARRIER MARKET:  
SERVICE REACH, MARKET SHARE AND GROWTH POTENTIAL***

**Competitive Carriers Expand Addressable Market Opportunities and  
Continue to Set the Stage for Continued Growth**

**LAS VEGAS – March 11, 2013** -- Today, New Paradigm Resources Group, Inc. (NPRG) announced the release of its new study examining the competitive telecommunications market. NPRG's newest report – *“The Competitive Carrier Market: Service Reach, Market Share and Growth Potential”* – details the markets served by each facilities-based competitive carrier, as well as the market share of each provider in those markets.

“Facilities-based competitive providers continued to expand and solidify their ability to reach new business customers,” said Craig Clausen, NPRG's Executive Vice President and Principal Analyst. “This report illustrates not only how far these carriers have come, but also how much more opportunity for growth lies before them.”

This report combines NPRG's ongoing research and extensive carrier databases with the detailed market and competitive provider databases developed by GeoResults. “Our telecom databases offer insights into market-level activity and shifts,” said Jim Kenny, Senior Vice President with GeoResults. “Combining our data with NPRG's service provider market analyses opens new views into who is gaining ground and who is not in telecom's business services arena.”

Additionally, this report was produced with the cooperation of COMPTTEL and its member companies. COMPTTEL is the leading trade association for the competitive communications industry. “COMPTTEL's carrier members are among the most innovative in the industry and have invested heavily in expanding their networks,” Clausen noted. “As a result, their in-market growth potential, as shown in this report, is significant.”

NPRG's *“The Competitive Carrier Market: Service Reach, Market Share and Growth Potential Report”* can be purchased by calling (312) 980-4701 or visiting [www.nprg.com](http://www.nprg.com).

NPRG's next industry analysis report will extend this research further by examining the fiber network operators – those service providers focused on construction fiber networks deep into metro areas and providing Gigabit bandwidth services.

**About New Paradigm Resources Group**

New Paradigm Resources Group, Inc. (NPRG) ([www.nprg.com](http://www.nprg.com)) is one of the nation's foremost research and consulting firms focused on analyzing the converging telecommunications and information industries.
